

Sante Fe Depot and Freight Office Acquisition Project

City of Fresno, Public Works Department

Sante Fe Depot City of Fresno

- Listed in the National Register of Historic Places
- The Fresno Depot of the Santa Fe Railroad was designed and erected in 1899 under the direction of W.B. Storey, Jr., engineer, who later became president of the Sante Fe Railway System.
- The building is designed in the California Mission style. Arches and tiled roofs comprise the general architectural elements. Unfortunately, during the process of constructing additions and remodeling the exterior and interior of the station, only the exterior retains most of the original architectural aspects of the Mission style.

Sante Fe Depot and Freight Office Acquisition Project

City of Fresno, Public Works Department

Project Scope:

- Acquire the 102-year old Santa Fe Depot and Freight Office and rehab for use as a passenger station. The station will serve as an entrance to the City and major transportation hub to improve train services.

Grant Amount: \$100,000
